Irinjalakuda, Kerala, India

PROFESSIONAL SUMMARY

Performance-driven Backend Developer with hands-on experience building scalable, high-availability applications using Node.js, NestJS, and TypeScript. Skilled in designing RESTful and GraphQL APIs following Clean Architecture and SOLID principles, with a strong focus on secure authentication using JWT and RBAC. Experienced in database optimization with PostgreSQL and MongoDB, containerization with Docker, and cloud deployments on AWS. Proven ability to deliver type-safe, maintainable code that solves complex business problems in Agile environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Backend: Node.js, Express.js, NestJS, GraphQL, Socket.io (WebSockets), REST APIs

Databases: PostgreSQL, MongoDB, Redis, Prisma ORM, Mongoose ODM

Frontend: Next.js, Redux Toolkit, Tailwind CSS, Framer Motion

Cloud & DevOps: AWS (Lambda, API Gateway, EC2, S3), Docker, Nginx, CI/CD, GitHub Actions, Vercel, Render, PM2, Linux/Bash

Testing & Tools: Jest, Playwright, Postman, Swagger, Git, GitHub, Vite, Jira, ESLint, Prettier, Figma, VS Code

Architecture & Concepts: MVC, SOLID Principles, OOP, Design Patterns, System Design, API Rate Limiting, Load Balancing, Data Structures & Algorithms, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | G-Tec Education, Irinjalakuda

Oct 2025 – Mar 2026

- Engineered and deployed MERN stack web applications using Node.js, Express.js, NestJS, and React.js, reducing page load times by 30% through lazy loading and component-level optimization.
- Implemented JWT-based authentication and role-based access control (RBAC) across 140+ REST API endpoints, achieving zero unauthorized access incidents.
- Designed and optimized MongoDB and PostgreSQL database schemas with advanced indexing strategies and query tuning, improving overall query performance by 40%.
- Collaborated in an Agile/Scrum team, participating in sprint planning, daily standups, and code reviews using Git and GitHub for version control.
- Wrote unit and integration tests using Jest and Playwright, increasing test coverage and reducing production bugs.

PROJECTS

RoyalKulture – E-Commerce Platform | *Node.js, Express.js, MongoDB, Handlebars, Bootstrap, JWT* | [GitHub](#)

- Built a full-stack e-commerce platform for diecast toys with server-side rendering using Node.js, Express.js, and Handlebars templating engine.
- Implemented JWT-based authentication with separate Admin and User dashboards, securing 100% of routes through role-based access control (RBAC).
- Architected a product catalog with CRUD operations and category filtering across 10+ categories, achieving sub-second query response times through MongoDB indexing.
- Developed a fully responsive UI using Bootstrap, achieving 98% cross-device compatibility and improving user experience metrics.

Node REST API – TypeScript Backend | *Node.js, Express.js, TypeScript, MongoDB, JWT* | [GitHub](#)

- Designed a scalable RESTful API using Node.js, Express.js, and TypeScript with modular Clean Architecture and industry-standard coding practices.
- Implemented JWT authentication with refresh token rotation strategy, securing 100% of API endpoints and reducing unauthorized access attempts by 95%.

- Structured MongoDB collections and indexes for high-volume request handling, achieving 50% faster query response times compared to baseline.
- Applied TypeScript interfaces, generics, and strict typing throughout the codebase, reducing runtime errors by 60% and significantly improving code maintainability.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

2021 – 2025

IES College of Engineering, Chittilapilly, Thrissur, Kerala | APJ Abdul Kalam Technological University (KTU)

Senior Secondary (Plus Two) – Computer Science

2017 – 2020

Santhinikethan Public School, Irinjalakuda, Kerala

LANGUAGES

English, Malayalam, Hindi
